-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 & 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Unternahrer (US Pat. 6,021,154).

Unternahrer discloses a laser shock peening system, which has a cavity dumping oscillator (14), a Pockel cell (20), a polarizer (22), an optically pumped laser (24), an amplifier and a focusing lens unit (40). (abstract, figure 1, col. 2, lines 9-59, col. 4, lines 28-67, col. 5, lines 1-53)

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-12 & 14-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Unternahrer, as stated above and further in view of Hackel et al. (US Pat. 6,198,069)

Unternahrer teaches a shock peening system but does not specifically disclose the use of an isolator or faraday isolator.

Hackel et al. discloses a laser shock system that uses polarizers, isolators, rotators, a Pockel cell or a faraday rotator. (abstract, col. 7 & 9) It would have been obvious to one of ordinary skill in the art at the time of the invention to use an isolator or faraday rotator as taught by Hackel et al. in the Unternahrer laser shock peening system because these are merely variations of a functionally equivalent device.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See US PTO-892.
